

Lancashire and South Cumbria Clinical Commissioning Groups Commissioning Policy Reviews

Sterilisation Reversal in Males and Females Public Engagement Outcomes			
When the public engagement took place	Start date	End date	Duration
	08 October 2018	02 November 2018	4 weeks
Number of survey respondents – electronic or on paper	Total	By gender	By disability
	35	Female: 51% Male: 49%	No disability: 66% Disability: 28%
	By sexual orientation	By ethnicity	
	Heterosexual: 94% Gay/Lesbian: 0% Bisexual: 0%	White British: 89% Asian ethnicity: 0% Other: 3%	Mixed ethnicity: 3% Black ethnicity: 0%
Number of people seen face-to-face	Not applicable		
	0		
Survey question response rates from patients and members of the public	97% of respondents read the varicose veins policy before completing the survey	14% of survey respondents had received this treatment/procedure	
	97% of survey respondents agreed that this procedure should not be routinely funded on the NHS		
Key issues/themes raised by patients and members of the public	Not a good use of NHS resources; people know what they are getting into		
	There may be some cases where it should be looked on sympathetically		
	Too much jargon used in the policy; needs to be in plainer English if the public are to give meaningful responses		
Responses to key issues/themes raised during public engagement	Comment noted		
	Any cases considered to be exceptions can be treated via Individual Funding Requests		
	Comment noted		

Key changes to the policy following public engagement (if applicable)	Not applicable
Policy ratified by Joint Committee of Clinical Commissioning Groups on 7 March 2019
